No part of this publication may be reproduced or transmitted in any form or by any means, electronic or mechanical, including photocopy, recording, or any information storage and retrieval system, without permission in writing from the copyright owner.

The appearance of the code at the bottom of the first page of an article in this journal indicates the copyright owner's consent that copies of the article may be made for personal or internal use, or for the personal or internal use of specific clients. This consent is given on the condition, however, that the copier pay the stated per copy fee through the Copyright Clearance Center, Inc. (21 Congress Street, Salem, Massachusetts 01970), for copying beyond that permitted by Sections 107 or 108 of the U. S. Copyright Law. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale. Copy fees for pre-1980 articles are the same as those shown for current articles.

MADE IN THE UNITED STATES OF AMERICA

CONTENTS OF VOLUME 205

NUMBER 1, NOVEMBER 1980

INVITED PAPER

- Studies of the Mechanism of Action and Regulation of cAMP-Dependent Protein Kinase
Joseph Granot, Albert S. Mildvan, and E. T. Kaiser 1

COMMUNICATION

- Proteolytic Modification of Human Phosphoglycerate Kinase from Lymphoblasts
T. O. Tollefsbol and R. W. Gracy 280

BIOCHEMISTRY OF VIRUSES AND NUCLEIC ACIDS

- Thymidine Accumulation by Choroid Plexus *in Vitro* *Reynold Spector* 85

BIOLOGICAL OXIDATION AND BIOENERGETICS

- Effect of Phospholipids on Beef Heart Mitochondrial Monoamine Oxidase
Makoto Naoi and Kunio Yagi 18
- A General Characteristic of Tumor Mitochondria: Leakage of Endogenous Mg^{2+} on Incubation with Uncoupler and Resultant Reduction of Uncoupler-Stimulated ATPase Activity
Jun-Ichi Hayashi, Osamu Gotoh, and Yusaku Tagashira 27
- Stoichiometry of H^+ Ejection Coupled to Electron Transport through Site 2 in Ascites Tumor Mitochondria
Antonio Villalobo and Albert L. Lehninger 210
- Mechanisms of Gentamicin-Induced Dysfunction of Renal Cortical Mitochondria. I. Effects on Mitochondrial Respiration
Joel M. Weinberg and H. David Humes 222
- Mechanisms of Gentamicin-Induced Dysfunction of Renal Cortical Mitochondria. II. Effects on Mitochondrial Monovalent Cation Transport
Joel M. Weinberg, Phillip G. Harding, and H. David Humes 232

ENZYME MECHANISMS AND METABOLISM

- The Carbon Dioxide Hydration Activity of Brush-Border Carbonic Anhydrase from the Dog Kidney
Styliani H. Vincent and David N. Silverman 51
- Anomalous "Saturation Kinetics" Occurring in the Reaction of L- α -Aminoadipate with Pig Heart Aspartate Aminotransferase
W. Terry Jenkins 57
- Sugar-Arsenate Esters: Thermodynamics and Biochemical Behavior
Rosario Lagunas 67
- Glutathione Peroxidase II of Guinea Pig Liver Cytosol: Relationship to Glutathione S-Transferases
Carl Irwin, Judy K. O'Brien, Peter Chu, Janis K. Townsend-Parchman, Pat O'Hara, and F. Edmund Hunter, Jr. 122
- Glyceraldehyde-3-phosphate Dehydrogenase from Human Erythrocyte Membranes. Kinetic Mechanism and Competitive Substrate Inhibition by Glyceraldehyde 3-Phosphate
Chi-Sun Wang and Petar Alaupovic 136

Tyrosine Metabolism for Cuticle Tanning in the Tobacco Hornworm, <i>Manduca sexta</i> (L.) and Other Lepidoptera: Identification of β -D-Glucopyranosyl-O-L-Tyrosine and Other Metabolites	Karl J. Kramer, Theodore L. Hopkins, Raad F. Ahmed, Delbert Mueller, and George Lookhart	146
Strongly Bound Nucleotide Derivatives in Lactate Dehydrogenase from the Sixgill Shark	Sylvester G. Spencer and Sonia R. Anderson	169
Excretion of Metabolites of $1\alpha,25$ -Dihydroxyvitamin D ₃ in Rat Bile	Bruce L. Onisko, Robert P. Esvelt, Heinrich K. Schnoes, and Hector F. DeLuca	175
Kinetic Properties of Membrane-Bound and Triton X-100-Solubilized Human Brain Monoamine Oxidase	Jerome A. Roth and Barbara J. Eddy	260

HORMONE STRUCTURE AND FUNCTION

Acid- and Temperature-Induced Conformational Changes in Human Chorionic Gonadotropin and the Mechanism of Subunit Dissociation	Hilda Forastieri and Kenneth C. Ingham	104
--	--	-----

LIPIDS

Enzymes of L-(+)-3-Hydroxybutyrate Metabolism in the Rat	W. Douglas Reed and Pinar T. Ozand	94
Intracellular Metabolite Gradients and Flow of Carbon during Photosynthesis of Leaf Protoplasts	Christoph Giersch, Ulrich Heber, Georg Kaiser, David A. Walker, and Simon P. Robinson	246

PHOTOSYNTHESIS AND PLANT BIOCHEMISTRY

Hydrogen Metabolism by Filamentous Cyanobacteria	Grant R. Lambert and Geoffrey D. Smith	36
--	--	----

PHYSICAL BIOCHEMISTRY AND PHYSICAL CHEMISTRY OF MACROMOLECULES

A Near-Infrared Method for Studying Hydration Changes in Aqueous Solution: Illustration with Protease Reactions and Protein Denaturation	David L. Vandermeulen and Newton Ressler	180
The Standard Gibbs Free Energy Change of Hydrolysis of α -D-Ribose 1-Phosphate	Marcella Camici, Francesco Sgarrella, Pier L. Ipata, and Umberto Mura	191
A Nuclear Magnetic Resonance Study of Cobalt II Alcohol Dehydrogenase: Substrate Analog-Metal Interactions	Beth-Ellen Drysdale and Donald P. Hollis	267

PROTEIN STRUCTURE AND FUNCTION

Isolation and Characterization of a Tartrate-Sensitive Splenic Acid Phosphatase in Gaucher's Disease	Douglas B. Robinson and Robert H. Glew	156
Species- and Cell-Specific Expression of H1 Histones in Tissue Culture Cells	Philip Hohmann	198
Direct Demonstration of the Highly Reactive Tyrosine Residue of Human Serum Albumin Located in Fragment 299-585	K. J. Fehske, W. E. Müller, and U. Wollert	217
Coenzyme B ₁₂ -Dependent Diol Dehydrase: Chemical Modification with 2,3-Butanedione and Phenylglyoxal	Sachiko Kuno, Tetsuo Toraya, and Saburo Fukui	240

REGULATION OF METABOLISM AND OF ENZYME ACTION

- Galactose-Specific Elimination of Human Asialotransferrin by the Bone Marrow in the Rabbit *E. Regoeczi, P. A. Chindemi, M. W. C. Hatton, and L. R. Berry* 76
- In Vitro* Demonstration of Alternate Stationary States in an Open Enzyme System Containing Phosphofructokinase
Klaus Eschrich, Wolfgang Schellenberger, and Eberhard Hofmann 114
- The Rate of Transmethylation in Mouse Liver as Measured by Trapping S-Adenosyl-homocysteine *Jerald L. Hoffman* 132

NUMBER 2, DECEMBER 1980

BIOCHEMICAL GENETICS AND CELLULAR DIFFERENTIATION AND DEVELOPMENT

- Immunologic Distinction of Human Muscle Adenylate Deaminase from the Isozyme(s) in Human Peripheral Blood Cells: Implications for Myoadenylate Deaminase Deficiency
William N. Fishbein, John I. Davis, K. Nagarajan, John W. Winkert, and John W. Foellmer 360

BIOCHEMISTRY OF VIRUSES AND NUCLEIC ACIDS

- Photochemical Cross-linking Studies on the Interactions of Avian Myeloblastosis Virus Reverse Transcriptase with Primer tRNA^{TP} and TTP
Alejandro Araya, Gerard Keith, Michel Fournier, Jean Claude Gandar, Julie Labouesse, and Simon Litvak 437

BIOLOGICAL OXIDATION AND BIOENERGETICS

- Ethylene from 2-Keto-4-thiomethyl Butyric Acid: The Haber-Weiss Reaction
James Diguiseppi and Irwin Fridovich 323
- Purification of Cytochrome P-450, NADPH-Cytochrome P-450 Reductase, and Epoxide Hydratase from a Single Preparation of Rat Liver Microsomes
F. Peter Guengerich and Martha V. Martin 365
- ATP Synthesis Catalyzed by the ATPase Complex from *Rhodospirillum rubrum* Reconstituted into Phospholipid Vesicles Together with Bacteriorhodopsin
Rachel Oren, Sara Weiss, Haim Garty, S. Roy Caplan, and Zippora Gromet-Elhanan 503
- Radical Mechanism of Aminopyrine Oxidation by Cumene Hydroperoxide Catalyzed by Purified Liver Microsomal Cytochrome P-450
Brenda Walker Griffin, Charles Marth, Yukio Yasukochi, and Bettie Sue Siler Masters 543

ENZYME MECHANISMS AND METABOLISM

- Metabolism of Prostaglandins and Xenobiotics by Adrenal Microsomal Monooxygenase in the Guinea Pig
David Kupfer, Javier Navarro, Gregory K. Miranda, and Anthony D. Theoharides 297
- Kinetics of the Coupled Aspartate Aminotransferase-Malate Dehydrogenase Reactions and Instability of Oxaloacetate on Anion-Exchange Resin
Eric R. Manley, Teresa A. Webster, and H. Olin Spivey 380
- Purification and Properties of a Chicken Liver Glutathione S-Transferase
Tin-Chuen Yeung and Anthony S. Gidari 404

HORMONE STRUCTURE AND FUNCTION

- Functions of Calcium in the Interaction of Progesterone-Receptor Complex with Nuclear Components *Mohammed Kalimi* 428
- Opioid Hexapeptides and Heptapeptides in Adrenal Medulla and Brain. Possible Implications on the Biosynthesis of Enkephalins *Alvin S. Stern, Randolph V. Lewis, Sadao Kimura, Jean Rossier, Stanley Stein, and Sidney Udenfriend, With the Technical Assistance of Louise D. Gerber, and Larry Brink* 606

IMMUNOLOGY

- Modification of Oligosaccharide-Lipid Synthesis and Protein Glycosylation in Glucose-Deprived Cells *S. J. Turco* 330

LIPIDS

- Involvement of a Thioesterase in the Production of Short-Chain Fatty Acids in the Uropygial Glands of Mallard Ducks (*Anas platyrhynchos*) *Mertxe De Renobales, Linda Rogers, and P. E. Kolattukudy* 464

MEMBRANE STRUCTURE AND FUNCTION

- Bilayer Orientation of Membrane-Bound NH₂ Groups Across Microsomal Vesicles and Their Role in the Function of Gastric K⁺-Stimulated Adenosine Triphosphatase *Parimal C. Sen, Zhou Meng Ai, and Tushar K. Ray* 340
- Microsomal Membrane Structure and Function Subsequent to Calcium Activation of an Endogenous Phospholipase *Kenneth R. Chien, S. Curtis Sherman, Stewart Mittnacht, Jr., and John L. Farber* 614

PHOTOSYNTHESIS AND PLANT BIOCHEMISTRY

- Regulation of Ribulose-1,5-Bisphosphate Carboxylase from Tobacco: Changes in pH Response and Affinity for CO₂ and Mg²⁺ Induced by Chloroplast Intermediates *Alan L. Hatch and Richard G. Jensen* 587

PHYSICAL BIOCHEMISTRY AND PHYSICAL CHEMISTRY OF MACROMOLECULES

- Terbium Luminescence as a Probe of the Calcium Binding Site of Trypsin and α -Chymotrypsin *John De Jersey, Robert S. Lahue, and R. Bruce Martin* 536
- Inactivation of Luciferase from the Luminous Marine Bacterium *Beneckeia harveyi* by Proteases: Evidence for a Protease Labile Region and Properties of the Protein following Inactivation *Thomas F. Holzman, Peter L. Riley, and Thomas O. Baldwin* 554
- The Specific Anion Effect on the Chromophoric Proton Dissociation of Heart Aspartate Aminotransferase *W. Terry Jenkins* 579

POLYSACCHARIDES AND COMPLEX CARBOHYDRATES

- Binding of Heparin to Antithrombin III: The Use of Dansyl and Rhodamine Labels *Michael W. Piepkorn, David Lagunoff, and Gottfried Schmer* 315
- Synthesis of Some Cluster Galactosides and Their Effect on the Hepatic Galactose-Binding System *Kitchitaro Kawaguchi, Mark Kuhlenschmidt, Saul Roseman, and Yuan Chuan Lee* 388

The Glycosaminoglycans of Estrogen-Induced Medullary Bone in Japanese Quail	
<i>Larry W. Fisher and Harald Schraer</i>	396

PROTEIN STRUCTURE AND FUNCTION

Laminin-like Glycoproteins in Extracellular Matrix of Endodermal Cells	
<i>Shigeo Sakashita and Erkki Ruoslahti</i>	283
Selective Modification of Rabbit Liver Fructose Bisphosphatase	
<i>M. M. deMaine and S. J. Benkovic</i>	308
Isolation of 3-Methylcrotonyl-Coenzyme A Carboxylase from Bovine Kidney	
<i>Edward P. Lau, Bruce C. Cochran, and R. Ray Fall</i>	352
Subunit Interactions of Nerve Growth Factor: Sedimentation Analysis of the Dis- sociation of the 7 S Oligomer Promoted by Salt and Ethylenediaminetetraacetate	
<i>Thomas E. Palmer and Kenneth E. Neet</i>	412
Resonance Raman Spectroscopy of Iron-Oxygen Vibrations in Hemerythrin	
<i>Susan M. Freier, Lori L. Duff, Duward F. Shriver, and Irving M. Klotz</i>	449
Ferredoxin-NADP ⁺ Oxidoreductase Is Active as a Monomer with Molecular Weight 33,000-36,000	
<i>Steven Sheriff, David C. Teller, and Jon R. Herriott</i>	499
Purification and Characterization of Calmodulin from Porcine Renal Medulla	
<i>Douglas W. Morgan, Soon Kim, Benedict J. Campbell, W. Y. Cheung, and Thomas Lynch</i>	510
Increase in the Stoichiometry of the Functioning Active Sites of Horse Liver Alde- hyde Dehydrogenase in the Presence of Magnesium Ions	
<i>Kojiro Takahashi, Henry Weiner, and James H. J. Hu</i>	571

REGULATION OF METABOLISM AND OF ENZYME ACTION

Calcium-Dependent Regulation of Glycogen Synthase Activity in a Muscle Glycogen Particle	
<i>Ashok K. Srivastava, Balwant S. Khatra, and Thomas R. Soderling</i>	291
A Procedure for Rapid Isolation of both <i>groE</i> Protein and Glutamine Synthetase from <i>E. coli</i>	
<i>Zachary F. Burton and David Eisenberg</i>	478
Characterization of a Stabilizing Factor of Rat Liver and of the Nature of Its Inter- action with ATP-Citrate Lyase	
<i>Bengt R. Osterlund, Mary K. Packer, and William A. Bridger</i>	489
Characteristics of Magnesium-Dependent, Ca ²⁺ -Stimulated Endogenous Protein Kinase-Catalyzed Phosphorylation of Basic Proteins in Myelin Isolated from Rat Brain Stem White Matter	
<i>Elena H. Petralli, Brenda J. Thiessen, and Prakash V. Sulakhe</i>	520
S-Adenosylmethionine, Cyclopropane Fatty Acid Synthase, and the Production of Lactobacillic Acid in <i>Lactobacillus plantarum</i>	
<i>Darwin D. Smith, Jr., and Scott J. Norton</i>	564
Coordinate Regulation of Adenylate Cyclase, Protein Kinase, and Specific Enzyme Synthesis by Cholera Toxin in Hormonally Unresponsive Hepatoma Cells	
<i>Jayantha Wimalasena, Ben H. Leichtling, Elaine J. Lewis, Thomas A. Langan, and Wesley D. Wicks</i>	595

STRUCTURAL PROTEINS

Role of Hydrophobic Interactions in Collagen Fibril Formation: Effect of Alkylureas <i>in Vitro</i>	
<i>Gerardo Suarez, Marta Veliz, and Ronald L. Nagel</i>	422
AUTHOR INDEX FOR VOLUME 205	623
CUMULATIVE SUBJECT INDEX FOR VOLUMES 199-205	625

Instructions to Authors¹

Archives of Biochemistry and Biophysics is an international journal dedicated to the dissemination of fundamental knowledge in all areas of biochemistry and biophysics. Manuscripts are welcome that contain new and significant information of general interest to workers in these fields. Sufficient detail must be included to enable others to repeat the work.

Manuscripts should be written in clear, concise and grammatical English and should be submitted in triplicate (one original and two photocopies), including three sets of figures, to:

Archives of Biochemistry and Biophysics
Editorial Office
111 Fifth Avenue
New York, New York 10003

Failure to receive the required number of copies of the manuscript may delay review.

Original papers only will be considered. Manuscripts are accepted for review with the understanding that the same work has not been published, that it is not under consideration for publication elsewhere, and that its submission for publication has been approved by all of the authors and by the institution where the work was carried out. Abstracts of oral or poster presentations are not considered to constitute previous publication. Presentation of material in preliminary communications normally will not preclude publication of a full paper in *Archives*, provided that the full paper contains additional information that justifies its publication and does not repeat the presentation of the same data that supported the preliminary communication. The manuscript should be accompanied by copies of all preliminary communications and of all relevant manuscripts that are in press or under editorial consideration by another journal. Authors must verify the wording of any cited personal communication with the persons who supplied the information and obtain approval for the use of their names in connection with the quoted information or for the citation of unpublished work; written evidence of such approval should accompany the manuscript. All material published in *Archives* represents the opinions of the authors and should not be construed to reflect the opinions of the Editors or the Publisher.

Authors should suggest competent reviewers in their field and may also suggest individuals whom they wish to have excluded from the review process. Contributors will receive decision letters from the Executive Editor. Resubmitted manuscripts and correspondence concerning such manuscripts should be sent to the Executive Editor at the address indicated on the decision letter. Revised manuscripts should be accompanied by a copy of the unrevised version.

Many acceptable papers require minor revision or condensation. It is in the mutual interest of both the authors and the journal that amended manuscripts be returned promptly. A revised paper will retain its original date of receipt only if it is received by the Executive Editor within 2 months of the date of return to the author.

Authors submitting a manuscript do so on the understanding that if it is accepted for publication, copyright in the article, including the right to reproduce the article in all forms and media, shall be assigned exclusively to the Publisher. The Publisher will not refuse any reasonable request by the author for permission to reproduce any of his or her contributions to the journal.

Communications offer a means of early publication of work of such importance that rapid release is warranted. They should not exceed five printed pages (approximately 4500 words), including tables and illustrations.

Form of Manuscript. Manuscripts should be typewritten and double-spaced throughout on one side of 8.5 × 11-in. white paper, with 1-in. margins on all sides. All pages should be numbered consecutively.

Subject Areas. Authors should specify on page 1 of the manuscript the Subject Area of the article submitted. See the back cover for the listing of the Subject Areas.

Page 1 should contain the article title, author(s), affiliation(s), a short running title (abbreviated form of title) of less than 65 characters including letters and spaces, the appropriate subject category for listing in the Table of Contents, suggestions for index list entries, and the name and complete mailing address (and telephone number if possible) of the person to whom correspondence should be sent.

Page 2 should contain a short abstract of 50–250 words.

Editorial style should conform to the *Handbook for Authors* (American Chemical Society).

Footnotes to the text should be identified by superscript Arabic numerals and should be typed double-spaced on a separate sheet; footnotes to tables should be identified by superscript lowercase italic letters (^{a,b}, etc.) and placed at the bottom of the table.

¹ An extended Instructions to Authors is published in the January issue of *Archives of Biochemistry and Biophysics*. Reprints are available from the Editorial Office upon request. Authors should consult the extended Instructions for details on nomenclature, IUPAC–IUB rules and recommendations, and accepted abbreviations.

Tables should be numbered with Roman numerals and cited consecutively in the text. Each table should be titled and typed double-spaced on a separate sheet. Units must be clearly indicated for each of the entries in the table.

Authors can submit complex tables and mathematical material as camera-ready copy. In this way, they are spared multiple, tedious proofreadings and the chance of error is reduced. Tables submitted as camera-ready copy should be typed single spaced whenever possible and preferably submitted as 5 × 7-in. glossy prints.

Figures should be cited consecutively in the text by Arabic numerals. Legends should be typed double-spaced on a separate sheet. All figures and illustrations are to be submitted in such form as to permit photographic reproduction without retouching or redrawing. Line drawings should be professionally drafted and no larger than 8.5 × 11 in. Letters and numbers should be at least $\frac{3}{16}$ in. (4 mm) in height (Leroy lettering size 200). Glossy prints of figures properly prepared are acceptable.

References should be cited in the text by an Arabic numeral in parentheses and listed at the end of the paper in numerical order typed double-spaced on a separate sheet. Abbreviations of journal titles should conform to those of *Chemical Abstracts Service Source Index*, 1969. Please note the following examples.

1. JONES, J. B., DILWORTH, G. L., AND STADTMAN, T. C. (1979) *Arch. Biochem. Biophys.* **195**, 255–260.
2. METZLER, D. E. (1977) *Biochemistry: The Chemical Reaction of Living Cells*, p. 298, Academic Press, New York.
3. HARRINGTON, W. F. (1979) in *The Proteins* (Neurath, H., and Hill, R. L., eds.), Vol. 4, pp. 246–409, Academic Press, New York.

Miniprint supplements are an effective way of presenting supportive data. They are printed from plates made by photographic reduction from typed pages provided by the author. Types of data that have been published as miniprint supplements include analyses relevant to studies of amino acid or polynucleotide sequences, details of chemical syntheses, preparation of enzymes, extended statistical or mathematical discussions, and X-ray diffraction data. The miniprint supplement is published in the journal, immediately following the parent paper, and is included in the reprints. Since the miniprint supplement is produced from camera-ready copy supplied by the authors with no redaction or editorial changes it is important that the copy be letter perfect and conform to the style of the journal. *Authors will not be permitted to make changes to the miniprint supplement at the proof stage. Any changes necessary in the proof must be made as a typeset "Note added in proof."*

Proofs will be sent to the author, with a reprint order form. Authors will be charged for extensive alterations.

Reprints. Fifty reprints of each article will be provided free of charge. Additional reprints may be purchased.
